

September Science Cafe

Envisioning the Nano City: How Will It Look?

Friday, September 21, 2012
5:30 p.m. - 6:30 p.m.
Arizona Science Center

600 E. Washington Street
Phoenix, AZ
602-716-2000

How do you envision the nano city?
Does it excite or frighten you? What
actions must we take today to achieve
the desired future, and prevent the
worst from happening?

Visions of nano-enhanced cities are
laden with utopian images of shiny
buildings, soaring architectures, and
symbiotic human-environmental
systems. However, there also are more
troubling scenarios of 'grey goo' and
robotic spiders that will devour
humankind. Join us as we explore a
variety of nanotechnologies applicable
to city environments with respect to
benefits, risks, sustainability, and
governance.

Arizona State University

Dr. Arnim Wiek
Assistant Professor
School of Sustainability
Arizona State University

Science Cafes are free, informal discussions that bring together members of the community and university scientists, to discuss how science and technology can change the future.

In the typical cafe, a scientist speaks for 5-15 minutes on a topic, with the rest of the time for the public to ask questions and present concerns.

Teachers receive 1 hour Professional Development for each Cafe attended
