

The Center for Nanotechnology in Society at Arizona State University is pleased to invite you to our first Science Cafe... *in Spanish!*

# Renewable Energy Through Photosynthesis

The presentation will explore the problem of climate change and possible solutions.

Ana L. Moore

Professor of Chemistry and Biochemistry  
College of Liberal Arts and Sciences  
Arizona State University

**Wednesday**  
**September 27, 2006**  
**6:00 - 7:00 p.m.**

**Friendly House**  
**802 S. 1st Avenue**  
**Phoenix, AZ 85003**  
**602-416-7243**

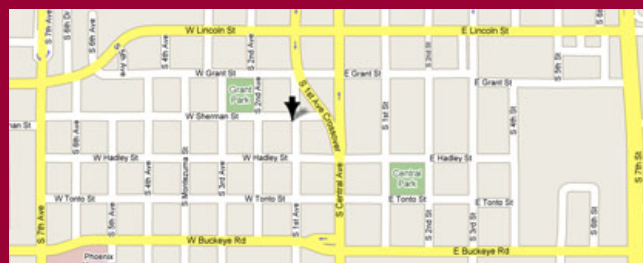

The Center for  
**Nanotechnology in Society**  
ARIZONA STATE UNIVERSITY

**Come hear what a scientist has to say about solar energy.**

*Is global warming for real?*  
*Why don't scientists agree?*  
*How does solar energy work?*  
*Can it save me money?*  
*Why doesn't the government promote alternative energy?*

Science Cafes are informal discussions that bring together members of the community and university scientists, to discuss how science and technology can change the future.

In the typical cafe, a scientist speaks for 5-15 minutes on a topic, with the rest of the time for the public to ask questions and present concerns.
