

Science Café

What's in our skincare?

Technology is accelerating changes all around us. Our skincare and beauty products are no exception. New advancements are constantly being made to the skincare products we consider a necessity. Is our safety taken into account with these constant modifications or is there an ugly truth behind the very products that promise us beauty? Find out with Arizona State University professor and Arbonne International Skincare Consultant.

Jameson Wetmore

Assistant Professor, School of Human
Evolution and Social Change ,
College of Liberal Arts and Sciences,
Arizona State University

Andrea Lewis

Skincare Consultant,
Arbonne International

Friday, January 20, 2012, 7-8 p.m.

Science Cafés offer the opportunity for informal public discussion on timely issues involving the impact of science, engineering and technology on our lives.

Each featured expert typically speaks for 10 to 15 minutes. The remaining time is then held for audience questions and feedback.

Teachers now receive 1-hour Professional Development credit for each Café attended.

Free Admission

Arizona Science Center

600 E Washington St.

Phoenix, Arizona

(602) 716-2000

The Center for Nanotechnology at Arizona State University is affiliated with the Consortium for Science, Policy & Outcomes (CSPO), in the College of Liberal Arts and Sciences. CNS-ASU research, education and outreach activities are supported by the National Science Foundation under cooperative agreement #0937591.
